

MARENOSTRUM.VR

PRIVACY POLICY

Version 1.0 · September 2026

Marenostrium.VR is an educational virtual reality application developed by X-Trudio LAB 3D · ERAM – Escola Universitària de les Arts, designed for the exploration and observation of representative Mediterranean seabed flora and fauna. This Privacy Policy explains how user data and information are handled when using Marenostrium.VR.

1. Collection of personal data

Marenostrium.VR does not directly collect, store or share users' personal data.

The application does not require users to create an account, register, sign in to any ERAM or X-Trudio service, provide a name, email address, telephone number, postal address or other personal information, or provide payment information.

Marenostrium.VR does not maintain its own user database and does not use its own analytics, tracking or user-profiling systems.

2. Internet connection

Marenostrium.VR does not require an Internet connection to operate.

The main experience runs locally on the virtual reality device, and Marenostrium.VR does not send users' personal data to ERAM or X-Trudio LAB 3D servers.

Distribution of the application and certain device- or platform-related services may be managed by Meta in accordance with Meta's own terms and privacy policies.

3. Use of device data and functionality

Marenostrium.VR uses the technical functionality required from the virtual reality device to run the experience correctly, including headset tracking, controllers and other Meta Quest platform functionality.

This information is used during execution of the experience to enable navigation and operation of the application.

Marenostrium.VR does not use this data to identify individuals, create profiles, perform advertising tracking or build a user database.

The presence of technical Android, Unreal Engine or Meta Quest permissions within the application does not mean that ERAM or X-Trudio LAB 3D collects or stores personal data associated with those permissions.

4. Use of personal data

Because Marenostum.VR does not directly collect users' personal data, such data is not used for commercial purposes, advertising, marketing, tracking, profiling or sale to third parties.

5. Advertising, purchases and subscriptions

Marenostum.VR is a free application.

The application does not include advertising, in-app purchases, subscriptions or paid content. No data is collected for advertising or commercial purposes.

6. Social features

Marenostum.VR is a single-user experience.

The application does not include social features, chat, user-to-user communication, user-generated content or multiplayer functionality. Therefore, Marenostum.VR does not collect or share personal data related to these types of features.

7. Sharing data with third parties

Marenostum.VR does not sell or share a database of users' personal data with advertisers, data brokers or other third parties.

The application is developed using Unreal Engine and distributed through the Meta Quest / Meta Horizon Store platform.

Meta and other platform components may process certain technical information necessary for device operation, security, diagnostics, application distribution or the user's Meta account. Such processing is managed directly by the relevant providers and is subject to their own privacy policies.

8. Data retention

Marenostum.VR does not maintain user accounts or its own database containing personal information about people who use the application.

Therefore, Marenostum.VR does not retain users' personal data for a defined period on ERAM or X-Trudio LAB 3D servers.

9. Data deletion and user rights

Because Marenostum.VR does not maintain user accounts or directly store a database containing personal information, there is normally no personal user data stored by Marenostum.VR that needs to be deleted.

However, any person who believes that ERAM or X-Trudio LAB 3D may have processed personal information related to Marenostum.VR may request information, access, rectification or deletion of that data.

Requests may be sent to X-Trudio LAB 3D · ERAM – Escola Universitària de les Arts at: sergio.cuervo@eram.cat.

The request should state that it relates to Marenostum.VR and provide sufficient information to identify and process the request.

Requests concerning data managed directly by Meta, such as information associated with a Meta account or Meta Quest services, must be handled through the mechanisms provided by Meta.

10. Educational use and minors

Marenostum.VR has been developed for educational purposes and may be used in educational contexts.

The application does not ask users to provide their name, age, email address, contact information or other personal data. It also does not include social features, user-to-user communication or user-generated content.

Use of Meta Quest devices, Meta accounts and platform services is subject to Meta's applicable age requirements, parental or guardian supervision requirements and platform terms.

11. Security and data minimization

Marenostum.VR has been designed according to the principle of data minimization.

The application uses only the technical functionality required to run the virtual reality experience and does not include its own infrastructure for collecting or storing users' personal data.

12. Changes to this Privacy Policy

This Privacy Policy may be updated if future versions of Marenostum.VR introduce new functionality affecting data processing, such as online services, user accounts, analytics, social features or other systems involving the processing of personal information.

This policy should be reviewed before each new public release of Marenostum.VR.

13. Contact
